Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

REQUEST FOR CORRECTED FILING RECEIPT

It is noted that the Filing Receipt (copy enclosed) issued in connection with the above-identified application indicates that this application is a continuation of U.S. application Serial No. 09/153,626 filed September 15, 1998, now U.S. Patent No. 6,243,931 issued June 12, 2001. In fact, the present application should be denoted as a divisional of application Serial No. 09/153,626. See the Examiner's December 28, 1999 first Official Action in the parent, U.S. application Serial No. 09/153,626 (copy enclosed) requiring election between method and product claims and indicating Applicants' election of the method claims, the Examiner's May 6, 2002 first Official Action in the present application (copy enclosed) requiring election between method and product claims and Applicants' July 1, 2002 Response To

Restriction Requirement in the present application (copy enclosed) electing the product claims.

It is noted that Applicants' Utility Patent Application Transmittal dated June 11, 2001 (copy enclosed) incorrectly identified the present application as a continuation of Serial No. 09/153,626, not as a divisional. Applicants regret this error and apologize for the inconvenience caused by the error.

It is respectfully requested, in view of the above facts and attached submissions, that a new corrected filing receipt be issued to reflect that the above-captioned application is a divisional application of U.S. application Serial No. 09/153,626 filed September 15, 1998, now U.S. Patent No. 6,243,931.

Applicants believe that no fee is due in connection with the filing of this Request For Corrected Filing Receipt. However, in the event that any fee is due, please charge deposit account 23-3000.

Respectfully submitted,

WOOD, HERRON & EVANS

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**Data entry by :** ZEWDIE, HULEMENAYE

**Team :** OIPE

**Date:** 06/29/2001

**LICENSE FOR FOREIGN FILING UNDER**  
**Title 35, United States Code, Section 184**  
**Title 37, Code of Federal Regulations, 5.11 & 5.15**

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**PLEASE NOTE the following information about the Filing Receipt:**

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 500 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."
- The title is recorded in sentence case.

Any corrections that may need to be done to your Filing Receipt should be directed to:

## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, 33 and 34, drawn to a method of making a casket lid, classified in class 264, subclass 112.
  - II. Claims 21-32 and 35, drawn to a casket lid, classified in class 27, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as fabricating a unitary casket lid by applying fiberglass and resin to a form in the shape of a casket lid, namely the process known as 'laying up' or by reshaping a preformed sheet of fibers and resin.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1732

4. During a telephone conversation Between Wayne Jacobs and Examiner William Miller on August 4, 1999 a provisional election was made without traverse to prosecute the invention of group I, claims 1-20, 33 and 34. Affirmation of this election must be made by applicant in replying to this Office action. Claims 21-32 and 35 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor

Art Unit: 1732

and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-3, 6-10,13,15,18-20,33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards in view of Elder and Nishibori.

Edwards discloses molding a casket using cellulosic material (wood pulp, rice straw, paper pulp) using an appropriately shaped mold. Elder shows a casket lid having a crown, a pie, a rim and a header. It would have been obvious to one of ordinary skill in the art to use the method of Edwards to form a casket lid with crown, pie, rim, and header because this is a conventional shape for casket lids as evidenced by Elder. Nishibori is directed to molding cellulosic material into any shape. The product may have a wood grain or a decorative sheet applied thereto (column 5, lines 26-41). It would have been obvious to one of ordinary skill in the art to apply a wood grain pattern to the molds of Edwards because Edwards indicates that artistic beauty can be had by forming the molds to give the desired result (column 2, first paragraph) and Nishibori shows that mold can be shaped to provide a wood grain.

***Allowable Subject Matter***

8. Claims 4, 5, 11, 12, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

9. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest that the wood grain pattern be applied in the manner set forth in the claims.

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schultz discloses applying a wood grain during molding (see Fig. 1).

## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, 33 and 34, drawn to a method of making a casket lid, classified in class 264, subclass 112.
  - II. Claims 21-32 and 35, drawn to a casket lid, classified in class 27, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as fabricating a unitary casket lid by applying fiberglass and resin to a form in the shape of a casket lid, namely the process known as 'laying up' or by reshaping a preformed sheet of fibers and resin.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1732

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
